

The Worshipful Company of Engineers

(Incorporated by Royal Charter 2004)

The Clerk

Cdr Peter Gracey

BEng CEng MIET FIRSE RN

Peter grew up in Chester and joined the Royal Navy as an engineer officer in the early eighties. He specialised in submarine weapon systems, working at sea and ashore in a variety of roles in submarines, squadrons, headquarters and procurement projects.

After 19 years, he decided it was time for a change, although he did maintain his naval links by joining the Royal Naval Reserve. His civilian career started with a short spell with BAE Systems, before joining the then recently formed Network Rail and retraining as a signal engineer. He has worked on many railway projects, including five years expanding the capacity of the DLR prior to the London 2012 Olympics and more recently four years on Crossrail. He finished his railway career with heading up the team dealing with Interoperability and Rail Vehicle Engineering at the Office of Rail and Road.

Peter is passionate about equality and inclusion. He helped to found and run three LGBT+ networks and actively supported others. He has worked with a number of organisations, including the Royal Academy and the engineering institutions to help improve diversity and inclusion in the industry.

Outside of work, Pete loves skiing and running. He ran 9 marathons between 2010 and 2015, but now sticks to shorter distances. He has three grown up children from his former marriage, and all three were present in September 2019 to see him marry his partner James, who is a critical care nurse at the Royal London Hospital.
